

# TRIOMUMMEL™

## PROTECTIVE GOWN WITH LONG ARM & INTEGRATED BELT

The TrioMummel™ protective gown is suited for protection of operating personnel within healthcare and home care when sampling and treating patients. The protective gown is made with recycled raw material, in polyethylene plastic from a completely waterproof material that is soft and comfortable to wear. The protective gown TrioMummel™ is produced in Sweden - of course with a CE-mark and approved by the Swedish Work Environment Authority with high delivery accuracy. TrioMummel™ is developed in collaboration with Swedish healthcare to ensure that the product is user-friendly and comfortable.

### PRODUCT

**TrioMummel™** A long-sleeved protective gown for use in intensive care and infection care made of a completely waterproof material in Medtech green color.

A protective gown with long sleeves that is easy to put on and take off. It is soft and comfortable to wear. The sleeve has holes for the thumb that make it easier to put on and take off gloves and an integrated belt that can be tied around the waist.
